

# Image filter

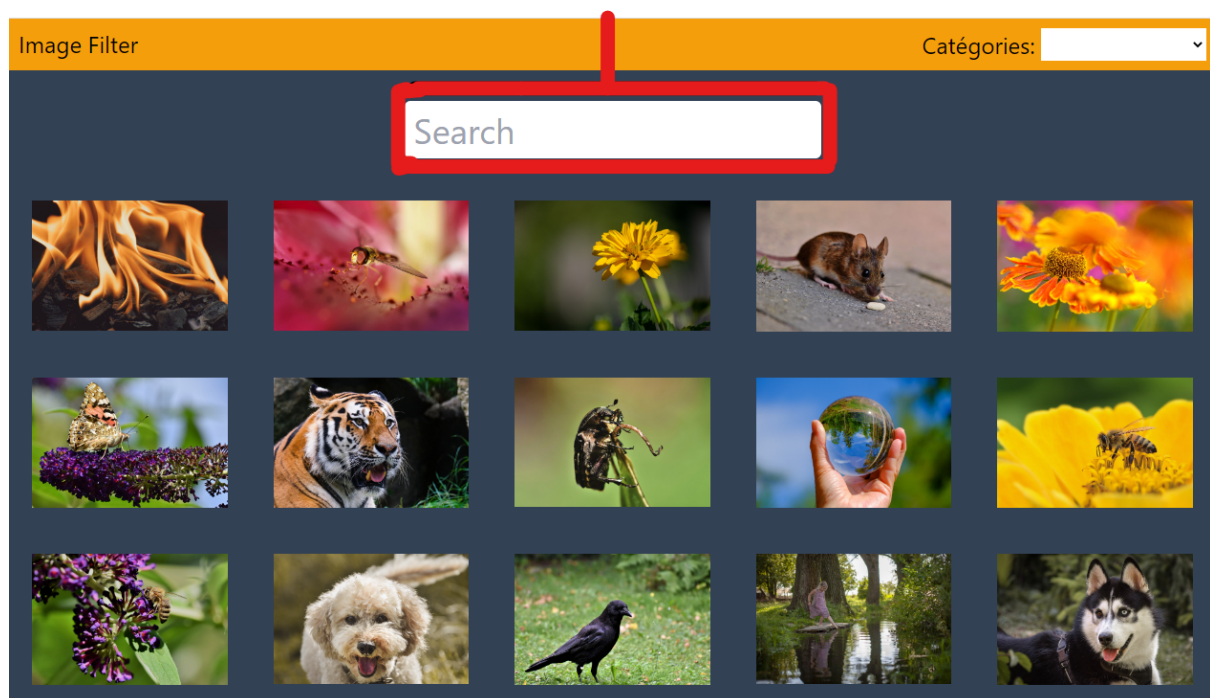

A simple/small image search engine connected to the pixabay api in ReactJS

**API:** Documentation : <https://pixabay.com/api/docs/>

## Features

SearchBar:

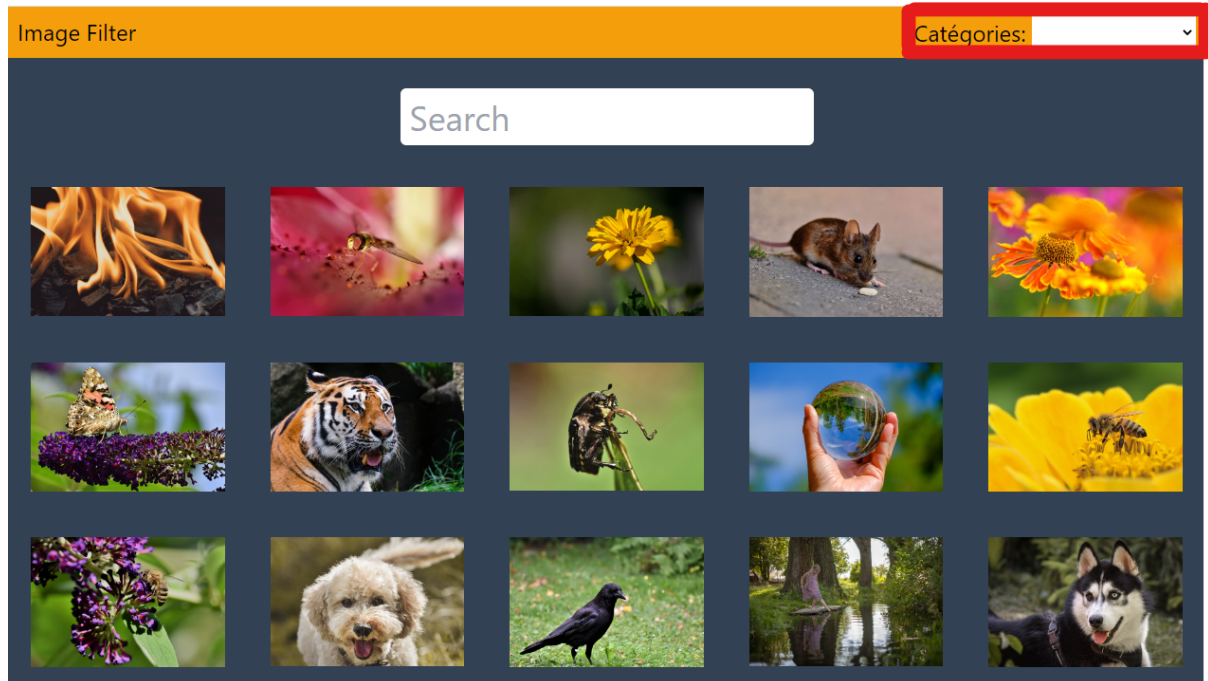

Interactive search bar that modifies the content at the same time as the text inside.

The bar will remain displayed even if you go down on the page.

## Categories:

Its a dropdown menu which allows you to choose the desired photo categories.

For now, we only have the categories recommended by the API

<b>category</b>	<i>str</i>	Filter results by category. Accepted values: backgrounds, fashion, nature, science, education, feelings, health, people, religion, places, animals, industry, computer, food, sports, transportation, travel, buildings, business, music
-----------------	------------	---

It's inside a array which is located `./src/components/categories.js`

```
const Categories = (props) => {  
  var category = ["backgrounds", "fashion", "nature", "science",
```

## Pagination:

For each page, you will have 10 lines of 5 photos (50 in total). Currently we have set the number of page to 10
